

# Now Getting Paid is VRA Efficient

**VRA**<sup>®</sup> Virtual  
Reimbursement  
Account

## Introducing VRA<sup>®</sup> from Zelis<sup>™</sup> Payments – the Platform that Connects You to Hundreds of Payers

A VRA<sup>®</sup> (Virtual Reimbursement Account) is the most efficient way to maximize payment process for your practice, facility or health system. By enrolling in a VRA, you gain efficiencies that help you reach a new level of productivity.

**100% Automated Payments • Reduces Processing Costs • Eliminates Manual Posting**

### The Benefits of Using VRA

- **Eliminates Manual Entry:** VRA settles payments directly into your bank account — no more typing, swiping or manual processes; you'll be notified instantly when payments settle.
- **Automates Re-Association:** Payments are settled as an ACH-CCD+ containing the Re-association Trace Number, which automatically re-associates payment with the 835 within your system.
- **Streamlines Workflow:** Without significantly changing the way you do business — VRA offers a choice of 5010 835 or EOP in a variety of formats and delivery options to meet the needs of healthcare organizations of all sizes.
- **Simplifies Payment and Data Handling:** VRA manages payments and data from multiple payers via ONE relationship with Zelis Payments. For large healthcare providers, we offer options for payment and data aggregation to simplify data handling and reconciliation.
- **Provides Savings on Payment Processing:** VRA offers a choice of ACA-compliant Automated Clearinghouse (ACH) or MasterCard<sup>®</sup> delivered payments; each are available with a flexible fee schedule to accommodate large and small payments and eliminate fees associated with manual processes, which substantially reduces processing costs.
- **Offers 24/7 Access to Payment Data:** VRA provides access to real-time reporting via the Zelis Payments secure online provider portal; account holders receive unlimited access to up to seven (7) years of payment data.
